AX PRO Series Wireless Intrusion

Simplicity through Innovation

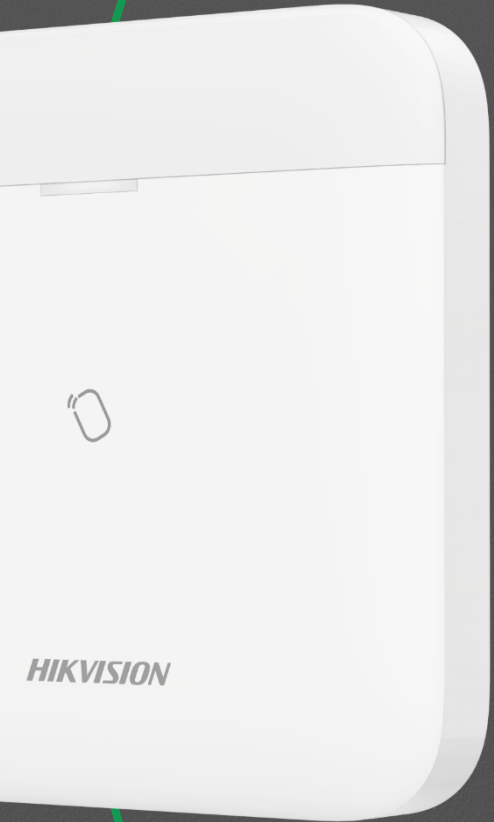

RF Repeater

AX PRO Series RF Repeater

HIKVISION®

AX PRO Series Repeater is a radio signal ranger extender that can boost the RF communication in AX PRO wireless alarm system.

RF Repeater

**Internal use only*

Key Features

HIKVISION[®]

Dual RF-chips, can boost the coverage all kinds of AX PRO Series wireless peripherals.

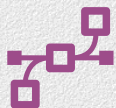

Extends Tri-X Wireless at a distance up to **1,600 m**.

Extends Cam-X Wireless compatible with **PIRCAM** by **800 m**.

Supports **4** repeaters for one panel.

Finding and connecting detectors automatically, smart auto-pairing.

**Internal use only*

System Topology

HIKVISION®

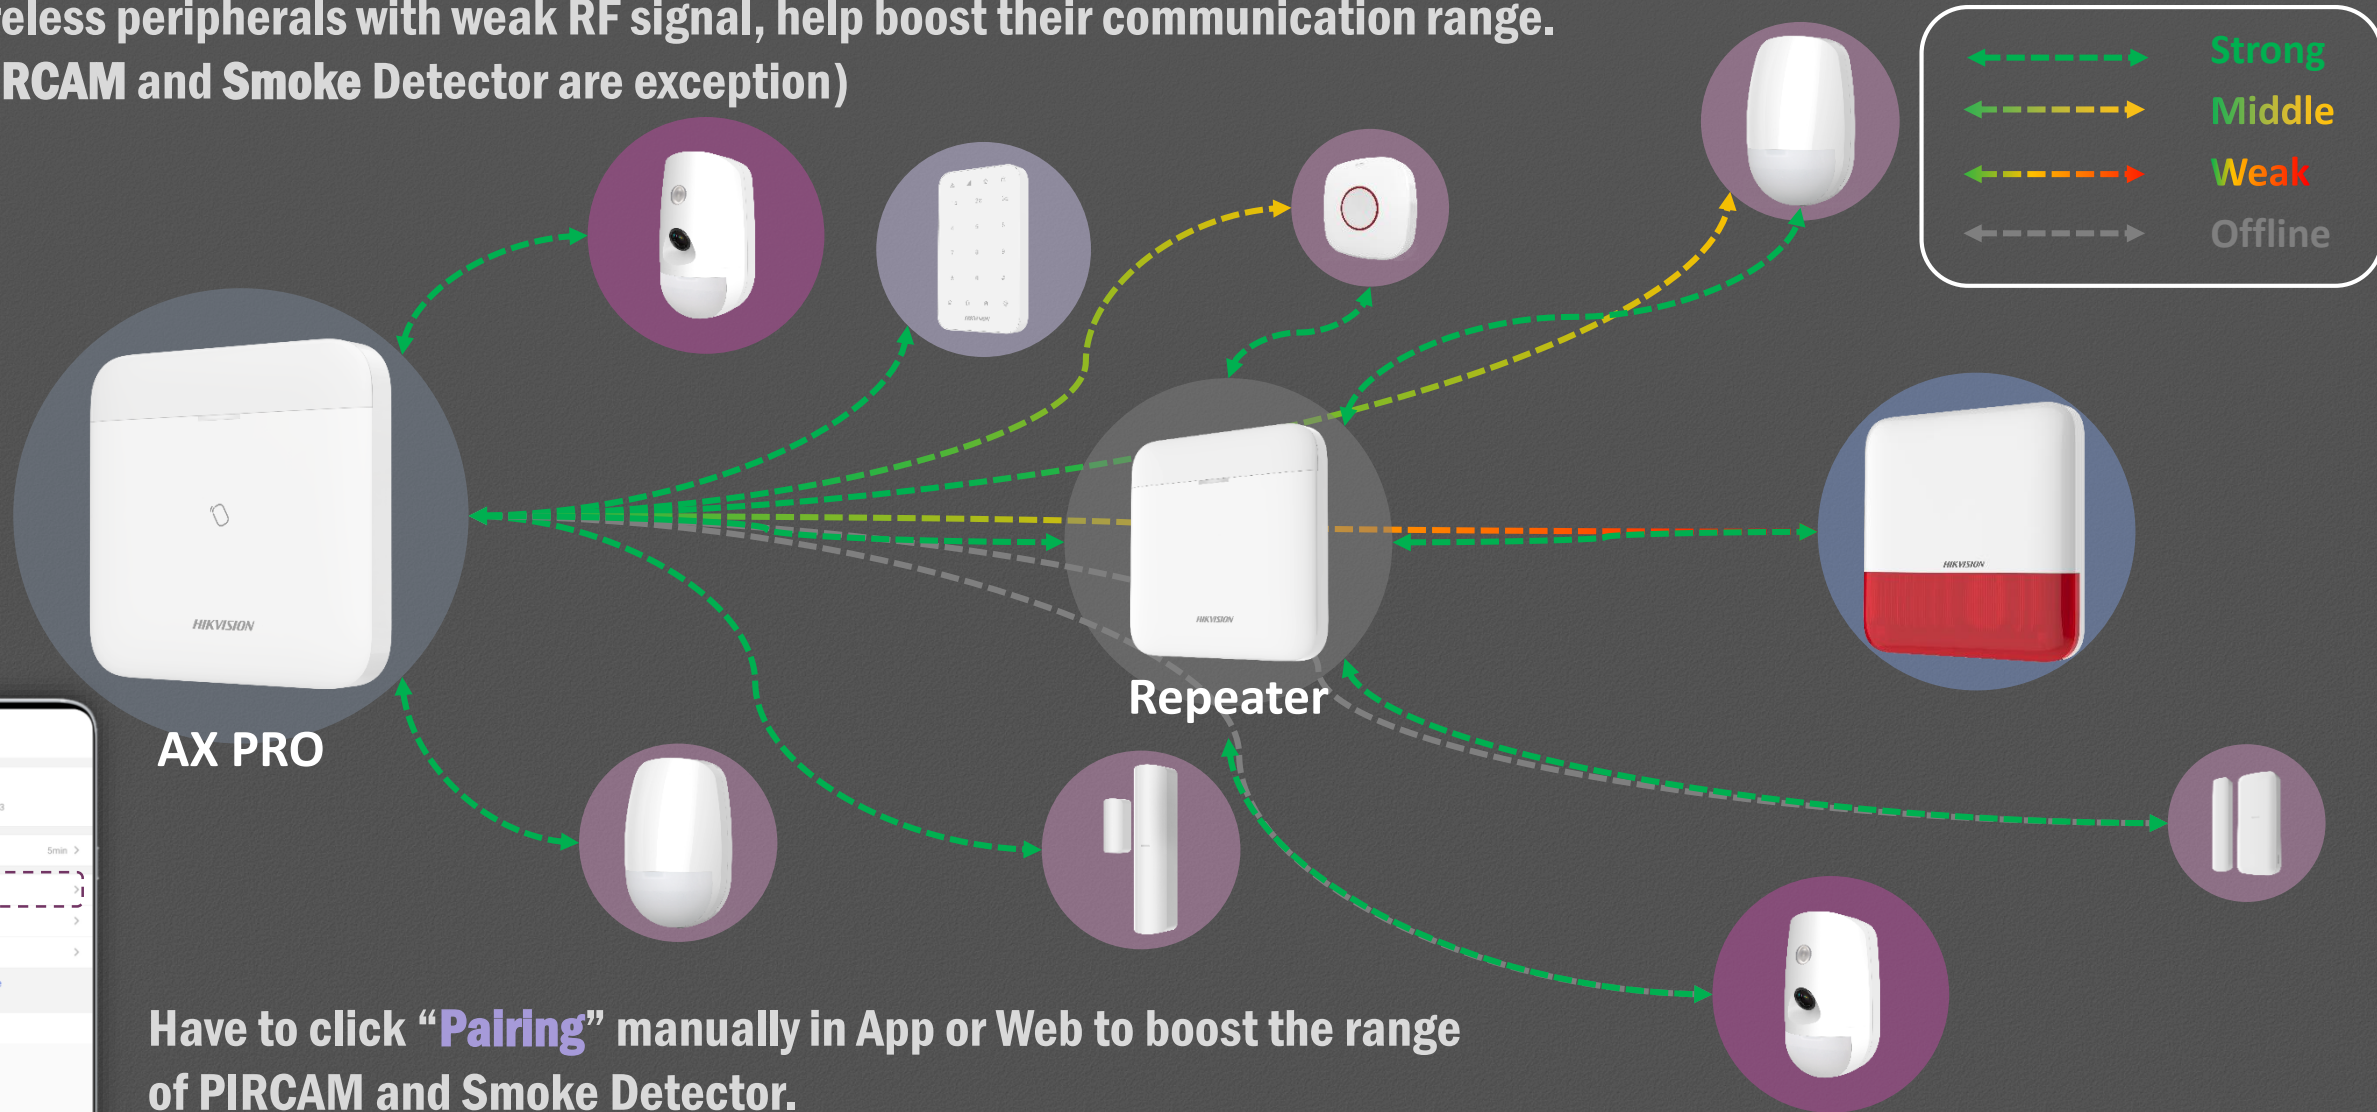

**Internal use only*

Smart Auto-pairing

HIKVISION®

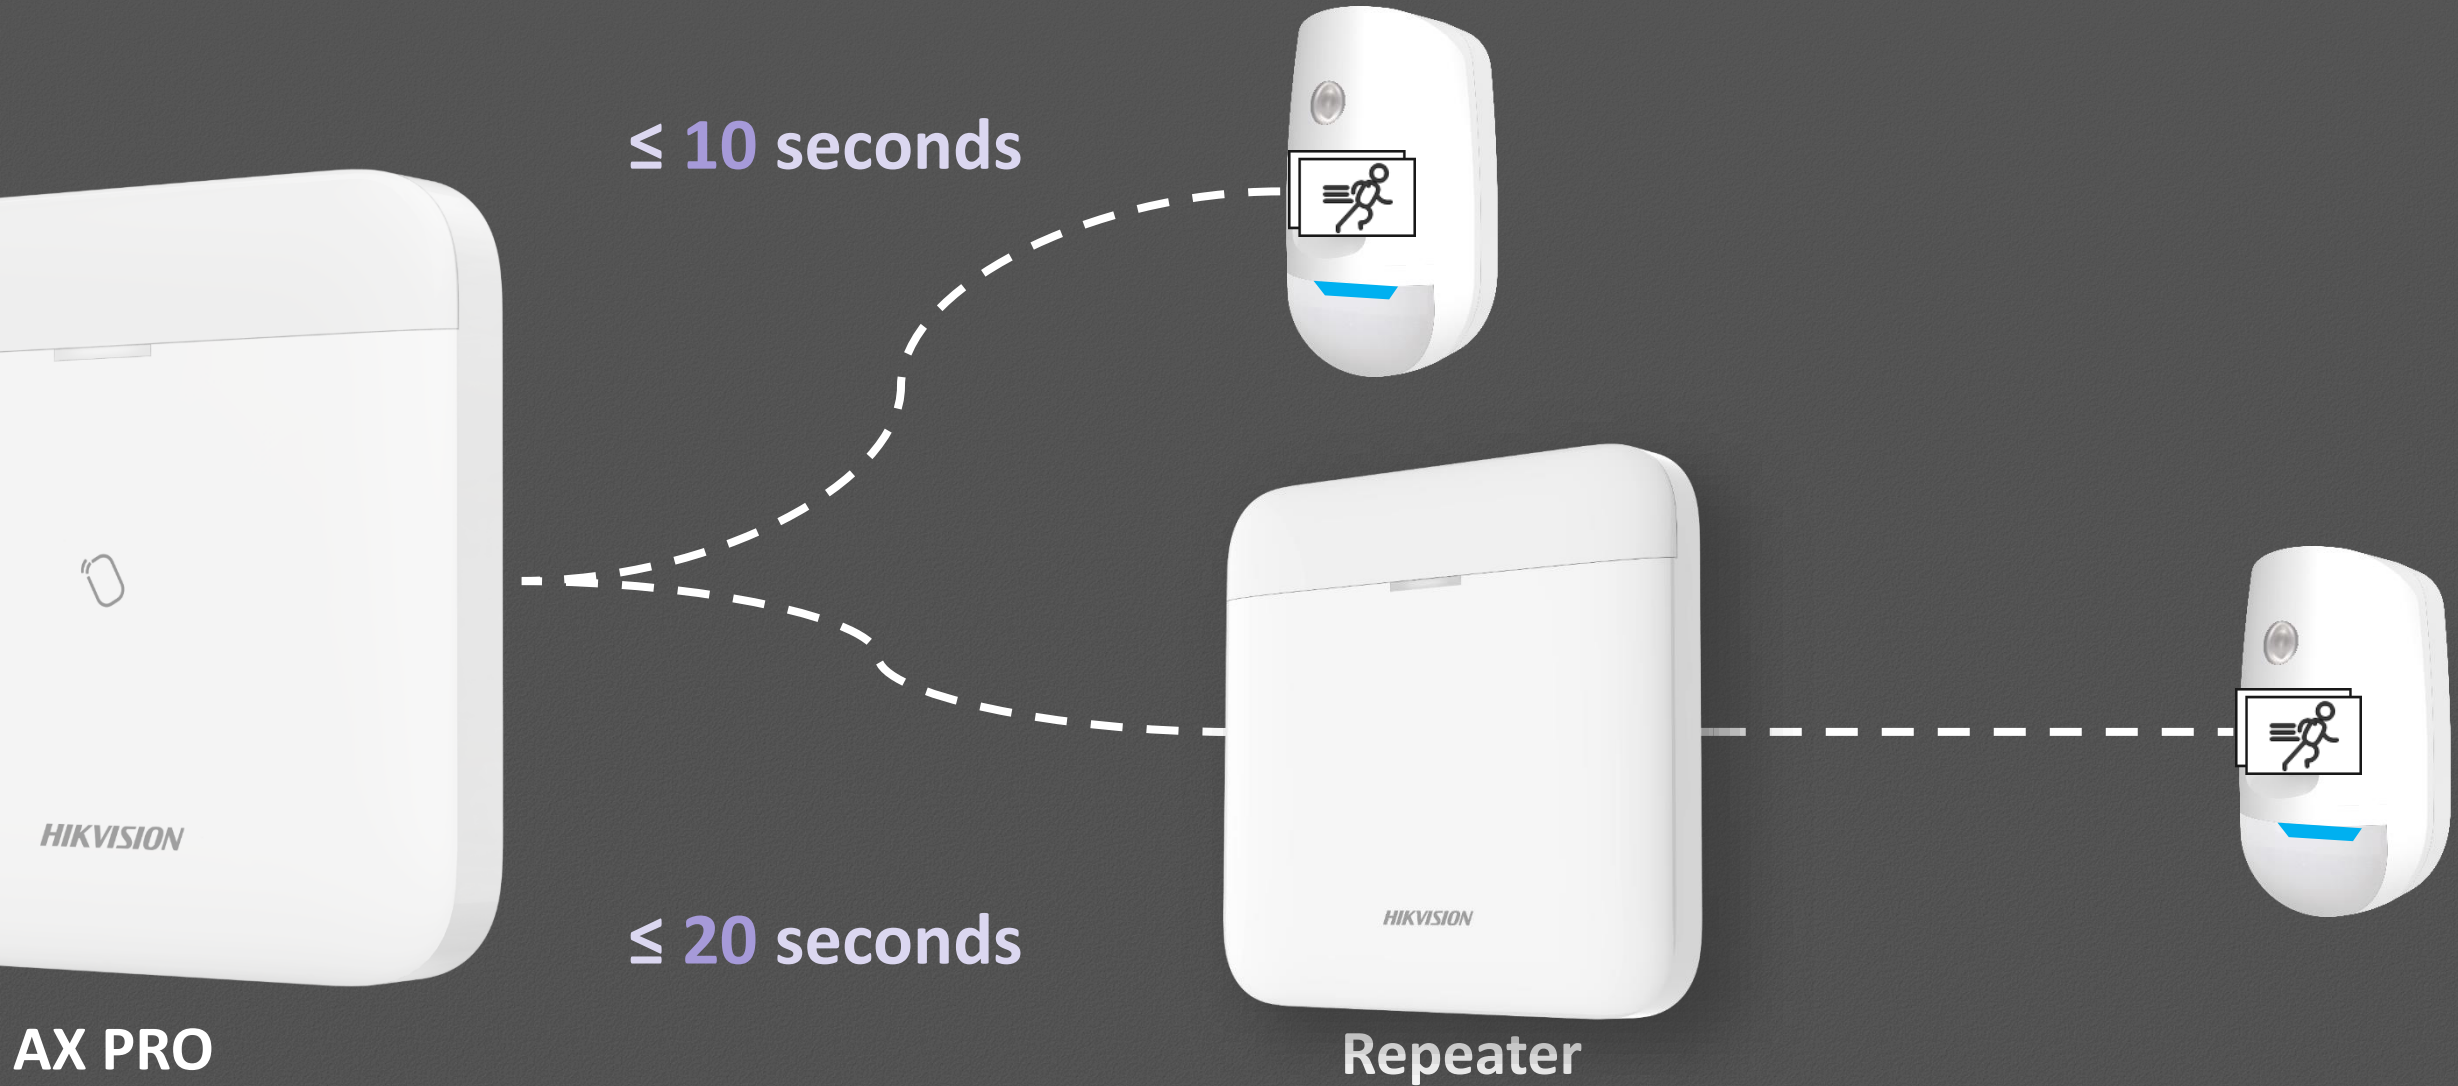

After added into AX PRO system, the RF Repeater will automatically find and connect the wireless peripherals with weak RF signal, help boost their communication range. (PIRCAM and Smoke Detector are exception)

Have to click **“Pairing”** manually in App or Web to boost the range of PIRCAM and Smoke Detector.

**Internal use only*

RF Repeater could connect PIRCAM, and could also help forward GIFs to AX PRO panel.

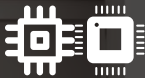

*Internal use only

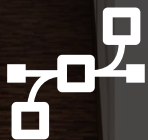

Larger coverage range

One M-level AX PRO panel could support up to **4** repeaters to protect a larger scenario, like a villa, a multi-story office building, and other SMB applications.

More efficient and safer

Adopts Dual RF Chips, repeater could boost the range of all the AX PRO series peripherals, could also forward GIFs to panel for verification.

More intelligent and easier to use

Supports Auto-pairing, repeater could find and connect the wireless peripherals with weak RF signal strength.

AX PRO Hub

HIKVISION®

Basic features

- Long RF communication range
- Up to **64** Inputs/outputs
- **8** Keypads & Tag Readers
- **32** Keyfobs, **32** Tags, **4** Sounders
- **32** Users, and **16** Partitions
- **PIRCAM supported** (800m Cam-X Wireless Range)
- **2** * Repeaters
